

PowerView™ Motorization

We didn't invent light. We just created a smarter, simpler and more convenient way to control how it plays through your daily life.

Welcome to PowerView™ Motorization from Hunter Douglas.

Intelligent shades
that simplify your life.

The modern lifestyle.

With PowerView™ Motorization from Hunter Douglas, the world's most beautiful window treatments are now the most intelligent. This innovative wireless system controls any powered Hunter Douglas window treatment in your home. Operate a single window treatment or all of them in perfect concert—all on your command.

Intelligent design makes the difference.

Precise Operation:

PowerView™ offers precise control of a variety of different Hunter Douglas products and styles, whether up, down, tilt or traverse.

Flexible Schedules:

With the PowerView App, you can quickly create customized Scenes that control all the shades in your home to operate together or in any combination you desire. Then you can easily schedule those Scenes to move your shades automatically so you don't have to.

Energy Efficient:

Easily link Schedules to sunrise and sunset times calculated by PowerView to control solar energy throughout the seasons or wake with the sun.

Secure:

Adjust shades while you are away via the RemoteConnect™ feature on your smartphone or tablet.

Child Friendly:

Simple, battery-powered and cord-free operation is aesthetically pleasing and safer for children and pets.

Diverse:

With the widest array of innovative styles, colors and fabrics in the industry, your motorized window treatments are as beautiful as they are intelligent.

Battery Powered:

Most PowerView window treatments are battery-powered, so they're easy to install, operate and maintain. The battery-pack is hidden behind the headrail so there's nothing to mar the beauty of your window treatments.

Here's how it works:

1) Start simple.

Meet the PowerView™ Pebble™, the stylish handheld control and the entry point for the entire PowerView system. With the Pebble Remote, or wall-mounted Surface Remote, you can quickly adjust any single powered window treatment or all the treatments in a specific room, totally on your command.

Enter a room and, like switching on a light, your shades operate at your command with the stylish Surface Remote. Or, reach for the Pebble Remote and adjust your shades on the fly to block the glare on a TV set, open to the view, or lower the shades for privacy without lifting more than a finger.

The Pebble is the perfect union of form and function, both simply elegant and elegantly simple.

PowerView™ Pebble™ Remote
features:

- The brilliantly designed Pebble Remote is ideal for room-centric control.
- The remote module is inserted into the Pebble and is available in white and black options.
- Six separate “Group” buttons to organize different groupings of products to your preferences.
 - An “All” button that activates all Groups at once.
 - Ability to set a “Favorite” position for each Group.
- Open and Close buttons for raising, lowering and traversing products.
- Tilt control buttons for opening, closing and rotating vanes and slats.
- A “Stop” button to adjust any shade to your perfect, preferred position.

The Pebble comes in seven perfect pops of colors from which to choose.

Convenience

from any wall.

The Surface Remote, which easily mounts to any wall, operates the same way and with all the same features as the Pebble Remote, but from a convenient fixed location.

It comes in several color options to mix and match to your personal style.

2) Direct control from your phone or tablet.

For more precise individual shade control or group control, use the PowerView™ App to send shades to specific positions with just the swipe of a finger. The PowerView App is available on Apple® iOS and Android™ mobile devices and requires a PowerView Hub for operation. The innovative PowerView Hub, which easily connects to your home's existing WiFi router, acts as the central nervous system for the entire PowerView Motorization system. It integrates all your motorized window treatments with the PowerView App, providing direct shade control and customized Scene settings from a single, central device. Then, from the convenience of your phone or tablet, use the PowerView App to quickly, precisely and with endless variety control the positions of all the shades in the room. Simply create your Rooms, add your shades to those Rooms, make a selection and use product-specific slider bars to adjust your shades to precise positions, 100% of the time.

3) Set your Scenes.

If you prefer to have Rooms operate independently, or work together in total synchronization, you can use the PowerView™ App to create distinct Scenes for your daily life. Your unique collection of personalized Scenes is easy to set up, operate and manage. Name them, color code them and organize them in the way that is easiest for you and your family to use. For example, greet the day with the arrival of the sun by opening the shades in your Master Bedroom and Kitchen to the perfect position for your morning activities. In the evening, have the whole home gracefully close out the day and ensure your privacy. The choice is yours. Scenes can be created within individual Rooms and compiled into Multiple Room Scenes to activate a whole host of activity throughout the home with a single press.

Scheduling: Once you have your Scenes created, you can use the PowerView™ App to schedule them to operate automatically, either with the clock or even the rising and setting of the sun.

GOOD MORNING

SUNRISE: OPEN VANES
MASTER BEDROOM
KITCHEN

DINNER

6:30 PM: ROTATE VANES
KITCHEN

INSPIRATION

1:30 PM: HALFWAY
OFFICE

NIGHTTIME

8:30 PM: ALL CLOSE
WHOLE HOME

4) Bring Scenes to life.

Once you have your Scenes created, you can control them on command with the PowerView™ Pebble™ Scene Controller or even your phone or tablet from anywhere in the world using RemoteConnect™.

Key features of Scene control:

RemoteConnect™: provides the ability to activate Scenes from anywhere in the world via your phone or tablet by creating an account with the PowerView™ App. Forget to close the shades before leaving on vacation? Log-in remotely to the PowerView App to set your shades in motion. RemoteConnect works through a secure Hunter Douglas server to keep your home safe and protected.

Scene Controller: Perfect for activating Scenes on the fly, the Scene Controller provides the added convenience of Scene control from the handheld Pebble and wall-mounted Surface.

Scene control

on any wall in any home.

PowerView™ Surface Scene Controller features:

- An OLED screen for displaying pre-selected Scenes.
- Scroll between and activate Scenes using the left and right arrow buttons and "Select."
- Two different "Favorite" options allow for one-button Scene activation.
- Set up and updating is done using the PowerView App.
- Easily mounts in key locations to control all the Scenes in your home.

Select from three finishes to adapt to the personality of any home.

It's your home.

Take control like never before.

Your control:

1) Pebble™ and Surface Remote:

At the heart of the PowerView™ Motorization system are the easy-to-use handheld and wall-mounted remotes that let you easily control and adjust a single window treatment or an entire room with the push of a button.

2) PowerView App:

Our innovative app allows you to use your smartphone or tablet like a remote control for individual shades, or the entire home, whether at home or away.

3) Pebble and Surface Scene Controller:

Working in concert with the PowerView Hub and App, you can activate pre-programmed Scenes directly from the handheld Pebble or wall-mounted Surface. Quickly scroll through a list of your personalized Scenes or activate using one of two Favorite buttons.

4) PowerView Hub:

The Hub attaches to your home's WiFi router and is the centralized brain of the entire PowerView system, storing the customized settings, activating Schedules and providing a central point of control for all PowerView window treatments in your home.

System control:

5) PowerView Repeater:

The Repeater is a small signal enhancer that discreetly plugs into any AC outlet in the home to extend signal range so PowerView can work throughout your home, regardless of its size.

The PowerView System is also designed for compatibility with most home automation system technologies on the market today, as well as Apple® iOS and Android™ tablets and mobile devices to expand the function of your wireless home.

It's time to experience
for yourself how
our intelligent shades
can simplify your life.

PowerView™ Motorization is available with an unrivaled selection of sophisticated styles, fabrics and colors from Hunter Douglas, the world leader in window fashions. With PowerView, your window treatments will become such an essential part of the way you live, you'll wonder how you ever lived without them.

The smarter side of style.

Light control.
Reimagined.
